

Vaccinated Travel Lane and Recognition of Overseas Vaccinations for Vaccination-Differentiated Safe Management Measures (SMMs)

Vaccinated Travel Lane

- A new **Vaccinated Travel Lane (VTL)** will be implemented to facilitate fully vaccinated persons to travel into Singapore under reduced border measures.

- We will start pilot VTL arrangements with **Brunei** and **Germany**.

- In lieu of SHN, vaccinated travellers under the VTL will undergo multiple COVID-19 PCR tests, including:

- A pre-departure PCR test within 48 hours of their scheduled departure.
- An on-arrival PCR test, and two additional PCR tests on Day 3 and 7 of their stay in Singapore.
- The number of VTL travellers will be limited by available flights, dedicated to the scheme.
- VTL travellers must travel on non-stop designated flights to Singapore.

- Vaccinated short-term visitors and long-term pass holders who wish to travel under the VTL will need to apply for a **Vaccinated Travel Pass (VTP)** between 7 and 30 days before their intended date of entry into Singapore.

- Applications for the VTP will start from **1 September 2021** for travel into Singapore from 8 September 2021.

- Returning Singapore Citizens and Permanent Residents who are vaccinated will automatically qualify and do not need to apply for the VTP in order to travel under the VTL.

Recognition of Overseas Vaccinations for Vaccination-Differentiated Safe Management Measures (SMMs)

- From **20 August 2021, 2359 hours**, a tamper-proof vaccination sticker will be affixed onto the passport of newly arrived travellers¹ who are fully vaccinated overseas with a WHO-Emergency Use Listing (EUL) vaccine, and can furnish a valid English-language vaccination certificate.

- These travellers will be eligible for vaccination-differentiated SMMs (e.g. dining out in groups of 5) in Singapore if they produce their passport with the valid tamper-proof sticker affixed.

- To obtain this sticker, travellers should produce their English-language vaccination certificates to officers at the Singapore immigration checkpoints upon arrival.

- By **September 2021**, upon verification of their eligible vaccination status at entry, travellers will also be recognised by Safe Entry Biz App through their TraceTogether App/Token to be eligible for vaccination-differentiated SMMs without needing to go through pre-event testing.

¹ These include Singapore Citizens, Permanent Residents, Long-Term Pass Holders and Short-Term Visit Pass holders from all countries/regions (i.e. Category I, II, III, IV).
